SUMMARY

Senior Data Analyst with 5+ years of experience delivering full-cycle analytics for digital products in AdTech, oil & gas, startups. Partnered with product, sales, finance and marketing teams to drive strategic decisions through A/B testing, statistics, and performance analysis. Engineered scalable data pipelines (SQL, Python, Airflow) and passionate about designing visually compelling, fully automated dashboards (Tableau). Currently integrating LLM-powered workflows to accelerate time-to-insight and streamline routine analytics.

EXPERIENCE

PropellerAds, AdTech Holding, November 2022 - Present

One of the world's largest traffic providers, delivering performance marketing solutions to a 1B+ global monthly audience

Senior Data Analyst, September 2024 – Present

- Provide full-cycle analytics across AdTech monetization, A/B testing, and AI-driven automation for the entire company including sales, finance, engineering, and marketing departments
- Reduced manual lead qualification time of 4 sales teams by ~2 hrs/day (~22%) through an automated LLM-powered advertiser scoring pipeline
- Enabled strategic advertiser account decisions by giving Marketing and Sales teams full visibility through the modernization of a 5-year-old legacy tiering system
- Built an end-to-end data pipeline and Tableau dashboard for Telegram app market analysis, including automated detection of active apps and MAU parsing, supporting a business stream generating ~10% of company's fiscal profit
- Collaborated with product, sales, and technical stakeholders to develop new advertising streams from scratch, including Telegram
- Mentored and fully integrated junior analysts into team workflows, standardizing analytical approaches to elevate overall efficiency
- Led 12+ A/B tests end-to-end (hypothesis design, metric definition, analysis, and interpretation), driving product and monetization decisions

Middle Data Analyst, November 2022 - September 2024

- Built a scalable Tableau dashboard ecosystem from the ground up for Finance, Product, Marketing, and Sales teams using SQL-driven data pipelines
- Optimized push notification subscription strategy through LTV analysis, eliminating low-value concurrent subscriptions that generated little revenue impact and preserving ~1% of daily profit
- Assessed revenue potential of in-app browser ad-opening mechanism, demonstrating low profitability and preventing unnecessary investment
- Led 10+ analytical deep-dives across projects (e.g., self-procurement of projects in Propeller, device model performance), validating hypotheses in collaboration with stakeholders
- Supported the Publisher team by analyzing complex incentive and bonus calculation logic, improving transparency and accuracy of compensation schemes

Gazprom Neft, Upstream, October 2020 - September 2022

Middle Digital Innovations Analyst, Strategy Analyst, February 2022 - September 2022

- Built a comprehensive database of digital solution providers from scratch, utilizing technology maturity metrics to evaluate and categorize vendor capabilities
- Contributed in the launch and conversion of 3+ R&D projects with a total potential revenue impact of \$300,000
- Supervised 2 junior business analysts and led a team of ~4 members on R&D projects
- Supported the development and launch of an internal "Tech Radar" using Python and BI tools (Tableau, Qlik Sense) to monitor digital and technology trends

Junior Analyst, October 2020 - February 2022

- Provided 10+ adhoc analytical reports for the deputy COO
- Conducted market research and business impact estimation in a gas detection UAV development project
- Led digital technologies trend research and benchmarking for the Department of Geological Exploration

EDUCATION

Lomonosov Moscow State University (MSU)

MS in Geology, Petroleum Engineering, 2020

BS in Geology, Petroleum Geology, 2018

Yandex Practicum

Data Engineering, 2024

Karpov Courses

Data Analysis, 2022

SKILLS

Stack

Python, SQL (Vertica, Postgres, Clickhouse, MS SQL), Tableau, Airflow, Looker Studio, Power BI, Docker, Google BigQuery, AI Tools, Jira, Git, Redash

Skills

Statistical Analysis, Product Analysis, BI Visualization, A/B Testing, Ad-hoc Research, DAG Building, Data Engineering, ETL, Data Management, Cohort Analysis, AI Integration, Market Research, Presentation, Mentorship, Project Management, CustDev Interview

Languages

English (Fluent), Japanese (Beginner and learning - JLPT N4), and Russian (native)
